Bachelor of Arts: Political Science, University of Minnesota: Twin Cities, Dean's List
Officer Candidate School, Virginia, United States Marine Corps

WORK HISTORY

Cyber Applications Team, Platform One, DoD DevSecOps, 06/2021 to 12/2021.

I received a competitive residency to work on a 6-man CAT team for DoD cyber security operations. I worked with X developer teams, pen tested X applications, and got X projects a certificate to field (CtF) within the DoD DevSecOps framework. This involved work with SD Elements, SonarQube, TruffleHog, BurpeSuite, and Fortify.

Developer,

Working on the OSX command line I deployed a helium validator node on top of Akash's open-source cloud computing platform. I helped onboard other users to Akash by running a website deployment service. I received two awards from TezosCommons for my work onboarding new users and was one of 20 developers selected to test Indigitus' open-source router for servicing a decentralized VPN.

Link 16 Unit Manager, United States Marine Corps, 05/2019 to Present,

At VMU-2 I led a 3-man team building and managing Link 16 networks. I also worked on designs to integrate the BATS/D platform into the RQ-21A.

US Naval Reserves, 08/2016 to 05/2019

ACCOMPLISHMENTS
